Subject: Alton Coal Mine

Thank you for the opportunity to provide input to the Alton Coal proposal. I sent a message earlier but am not sure it was received based on my new computer and my computer skills. I am sending again to assure it is received within the time frame to provide comment. I think I'm in under the wire.

I own a historic pioneer home built in Panguitch in 1897 located one block from Highway 89. The haul route for the proposed coal mine proposes to haul through the National Historic District of Panguitch.

I request the State consider the consistency of the proposed haul route with the National Historic District designation and how hauling coal with trucks traveling every 4 minutes every day will be consistent with preserving our historic district designation.

Thank you for considering this comment and concern
